HELM-HAR

# ABOUT US - MISSION

---

Harol is the first Italian company to introduce **helmets for Non-Invasive Ventilation (NIV)** since the early 1990s.

Over 30 years, thanks to close partnerships with doctors and nurses, **we have developed several models of patient interfaces**, always technologically advanced, capable of responding to the clinical needs of operators, **without ever losing sight of patient's comfort.**

## HAROL

---

### Innovative solutions

**We produce helmets in different configurations to best meet the requirements of all types of healthcare professionals and departments.**

#### HERE ARE SOME FEATURES THAT MAKE HAROL HELMETS UNIQUE:

- » The collar is made of two types of material: in **polyurethane and in silicone**, in order to guarantee an even better sealing.
- » HAROL helmets are the only ones on the market that allow you to switch **from using the helmet with atraumatic underarm fastening straps to using it without them and vice versa**, without changing helmet model.
- » The models **with zipper** allow complete, **quick and total access** to the head of the patient in few seconds.
- » The "one-piece" helmets **can be used without underarm fastening straps** to avoid ulcerations under the armpits.
- » **The helmets can be equipped with an inflatable cushion** in order to ensure greater patient comfort.

ALL MODELS ARE AVAILABLE IN **7 SIZES FOR ADULTS**  
AND IN **2 SPECIFIC NEONATAL AND PEDIATRIC VERSIONS.**

# Three different types of access to the patient head

## 1 ONE-HAR WITH ACCESS PORTS

### « EASY TO USE

One-piece and user-friendly system, with access to the patient head through a porthole for nursing operations.

### « EFFECTIVE

The system is available both with **silicone collar** for maximum sealing and the best patient's comfort, and with **polyurethane collar** with seal on upper part of torso.

### MODULAR SYSTEM

Available in the version with **integrated inflatable cushion: this model further improves patient comfort** by providing support to the cervical area, ensures more stability to the helmet and **allows its use without underarm fastening straps.**

## 2 FAST-HAR WITH SEALED ZIPPER

### MODULAR SYSTEM

The optional inflatable cushion **further improves patient comfort** by providing support to the cervical area, ensures more stability to the helmet and allows its use without underarm fastening straps.

### EASY TO USE »

One-piece helmet, easy to use, with a **sealed zipper** for complete and quick access to the patient's head.

### EFFECTIVE »

The system is available both with **silicone collar** for maximum sealing and the best patient's comfort, and with **polyurethane collar** with seal on upper part of torso.

## 3 HELM-HAR OPENABLE IN TWO PIECES

### « EASY TO USE

Two-piece and **snap-open** system that allows complete removal of the tent for total access to the patient's head.

### « EFFECTIVE

The rigid ring with silicone sealing collar guarantees **maximum sealing and best comfort.**

### MODULAR SYSTEM

By inserting the optional **inflatable cushion**, the helmet can be used without underarm fastening straps.

The inflatable cushion **further improves patient's comfort** by providing support to the cervical area and more stability to the helmet.

## SOLUTIONS FOR HOSPITAL ASSISTED VENTILATION
